The drawings are objected to because in Fig. 2, reference numeral "25" is not as described on page 7. Element "855" is used for two different elements in Figs. 4 and 7. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: The problems with the drawings discussed above are also ambiguous as disclosed. See page 7 (element 25) and pages 8 and 9 (element 855).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shewchuk.

See door 10, groove 23, hinge leaf 34 and groove 38 therein, and seal 14.

Claims 25 and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Belvin.

See "flange" 7, sloping groove 10, door 4, hinges 16 and sloping rib 17.

Claim Rejections - 35 USC § 103

Art Unit: 3634

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sargent et al.

See continuous seal 42. Providing seal 42 in segments to ease installation would have been obvious to one of ordinary skill in the art. See continuous rib 50. The upper and side frame members define a "U" and the bottom frame element is a "threshold".

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Applicant's declaration is noted.

Allowable Subject Matter

Claims 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5,7-10 and 12-19 are allowed.
